

Amendments to the Specification:

Please replace paragraph [0010] with the following:

-- [0010] The terms "breathability" or "breathable" refers to a material or materials which is permeable to water vapor or moisture having a minimum moisture vapor transmission rate (MTVR) of 3 perms, i.e., about 17.164 kilogram per pascal second square meter ($\text{kg}/(\text{Pa} \cdot \text{s} \cdot \text{m}^2)$) ~~172 nanograms/m.²/Pa/sec (or 6.7 g/100 sq. in./atm/24 hours)~~ or greater. The MTVR is measured using a standard ASTM measurement, i.e., ASTM E96-80 Proc. A.--
